

# Dell EMC Smartfabric Services for VxRail

## Autonomous fabric deployment, expansion, and lifecycle management for VxRail

SmartFabric Services is a 'one-of-a-kind' feature – its introduction creates a fully integrated solution between the fabric and a Hyper-Converged Infrastructure (HCI) such as VxRail.

1. The only fully automated network fabric for VxRail hyper-converged environments
2. The 1st HCI appliance with network configuration automation
3. Automates up to 98% of the network configuration steps for VxRail hyper-converged environments
4. Provides 100% fully automated, zero-touch operation for VxRail hyper-converged networks

Deployed, managed, optimized,  
and automated as a **single** entity

## Why should you choose Dell EMC Smartfabric Services for Vx Rail?

Automated Fabric  
Deployment

Integrated  
Lifecycle  
Management

Pay-as-you-grow  
expansion

Integrated  
Management &  
Orchestration
