

A man and a woman in business attire are sitting at a desk, looking at a tablet together. The man is wearing glasses and a suit, and the woman is also in a suit. They are both smiling and appear to be in a collaborative meeting. In the background, there is a laptop and a glass of water on the desk.

# Aruba Technology Enablers at the Intelligent Edge

# The smart workplace: Why now?

- Problem 1: Workspace supply and demand with increasing real estate prices.
- Problem 2: Booking tools people hate using! – Retention.
- Problem 3: Manifestation of the problems through employee behaviour

# Challenges faced by employees:

- Is the Board Room available tomorrow?
- Is there a room available with a screen and projector / Apple TV
- I've never been to this office before, where is
- Tell me when the balcony room becomes available.
- No consequences for worst offenders.
- Parking reservation and booking for guests.
- Guests need Wi-Fi authentication and securely.
- I'd like catering with the meeting.
- The room needs cleaning..

## AI-Powered Analytics and Assurance Innovation

NetInsight

# WHAT WE ARE ANNOUNCING

## Smart Digital Workplace Partnerships

 Herman Miller

**Deloitte.**

**CBRE**

 Microsoft Teams

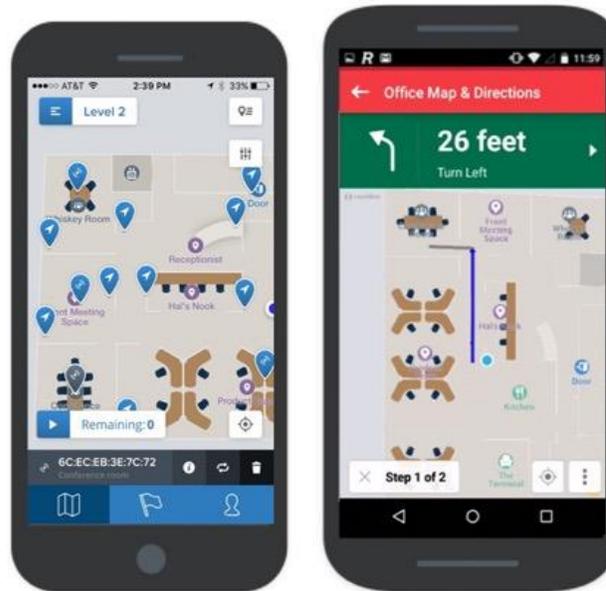

**zoom**

# Challenges faced by employers:

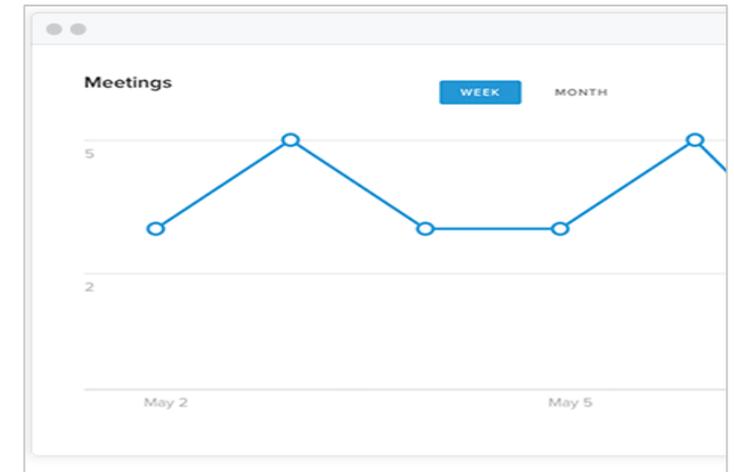

- **We need to Engage with Visitors and Employees**
- with notifications about in-house services and events

- We need to give guests turn-by-turn directions to their meetings and live bookings

- We need to **analyze trends in conference room use over time.**
- **Retention, the workspace should be an easy to work with & intuitive environment:**

# Business drivers – 3 focus points.

## Increase workspace efficiency

- by giving guests turn-by-turn directions to their meetings and live bookings

## Increase building efficiency

- by reducing power to unused rooms, reducing air conditioning and heatmap of usage

## Increase guest and employee satisfaction

- by making the workplace easier and open to work in. Guests enjoy a modern and slick approach.

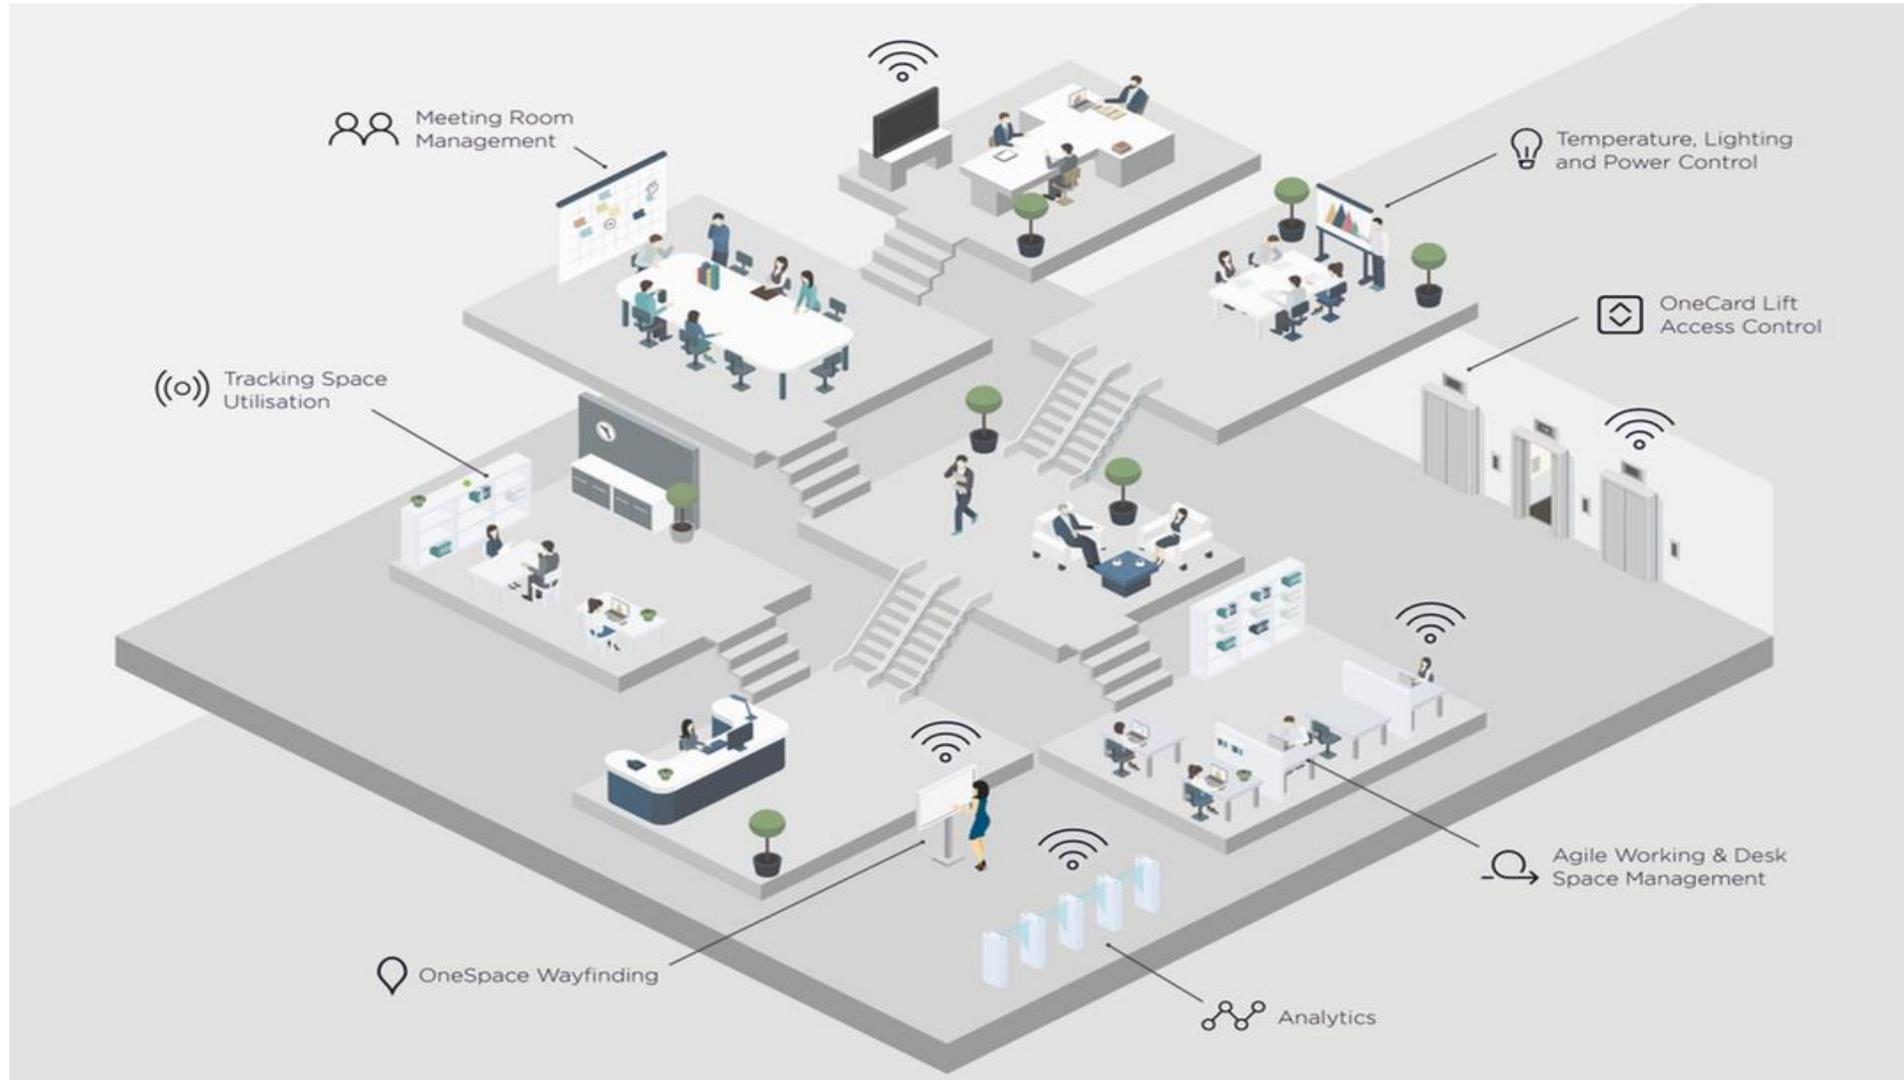

a Hewlett Packard  
Enterprise company

# Solution:

End to end workspace intelligence

# Multiple Sources, Multiple Resources = Intelligent Space.

# Customers are asking for:

- **Need for Seamless, centralized management**

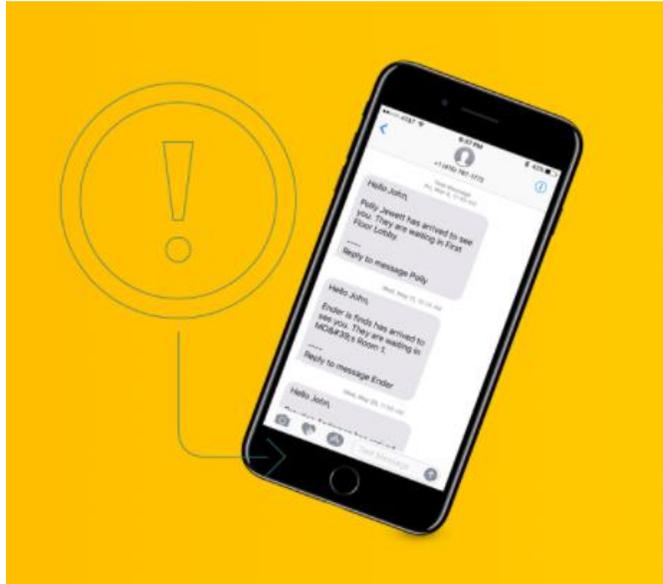

- Management dashboard
- Security
- Visitor management
- Calendar integrations
- Desk reservations

- **Workplace data that matters**

- Room utilization
- Meeting cancellations
- Zombie meetings
- Meeting duration
- Meeting participants
- Visitor details
- Resource popularity
- Compare metrics by location

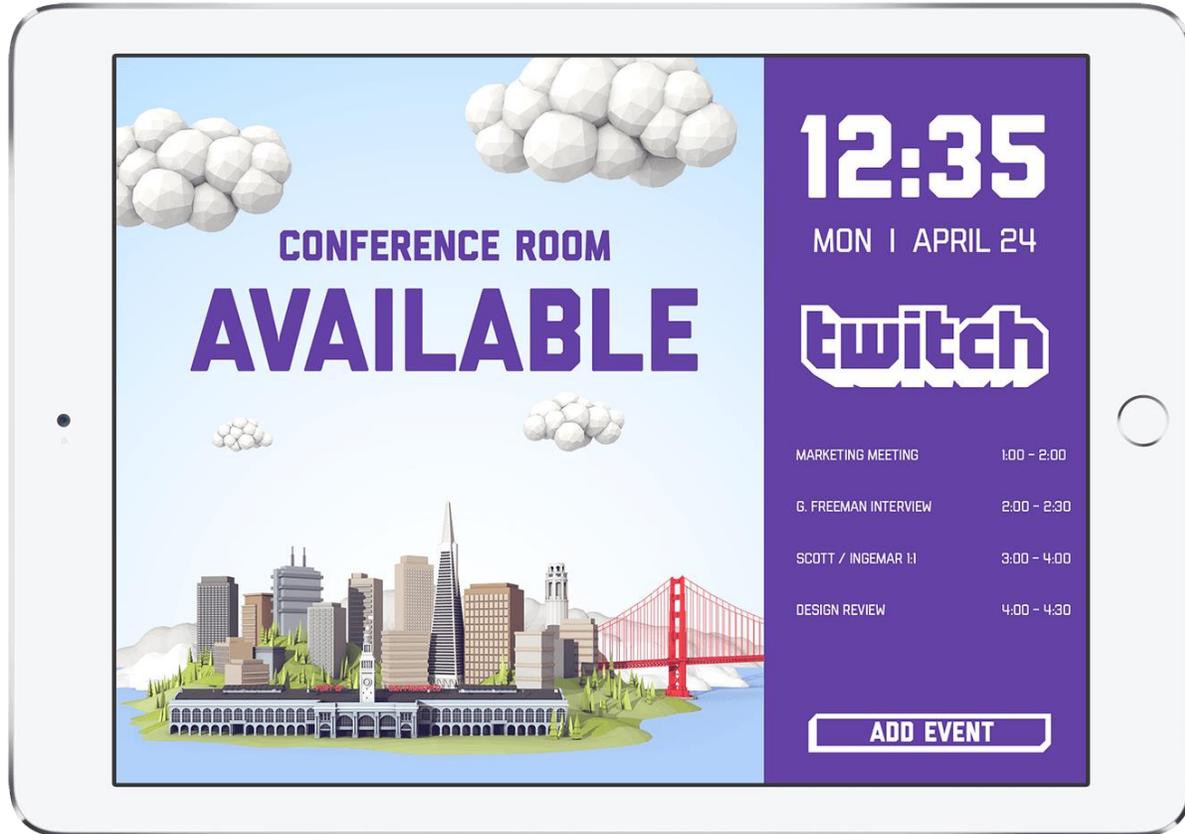

# Digital Concierge: ClearPass integration (LobbyConnect )

- Eliminate paper visitor logs while easily keeping track of who is visiting your office and when they are checking in. The solution also remembers everyone who checks in so returning visitors don't have to fill in all of their information every time they visit.
- USE THIS TO PUSH THE CORPORATE APPLICATION.

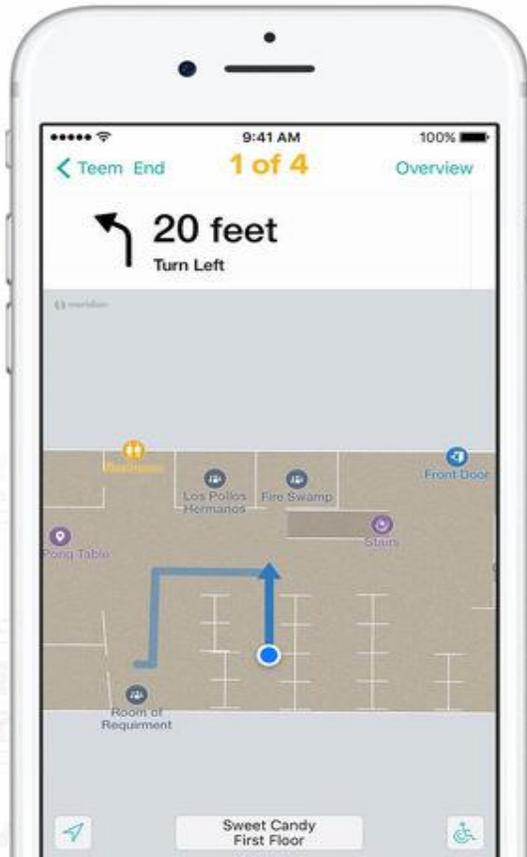

# App-based customizable room panel: Big Differentiator.

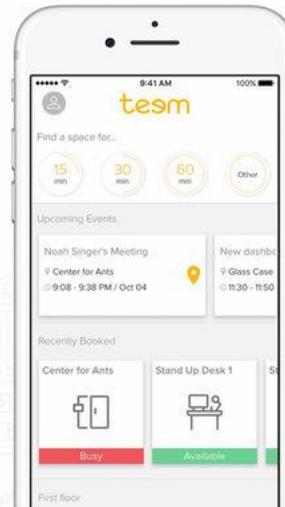

- Fight room theft with highly visible schedules
- Stop no shows by requiring meeting check-ins
- Use to show or report faulty room facilities ie Apple TV or Projector.
- Runs on Ipad/ Android/ Amazon Kindle HDs- huge cost differentiator.

# Mobile apps – Booking on the move:

## Indoor Turn-by-Turn Directions

## Quickly Find Available Rooms & Desks

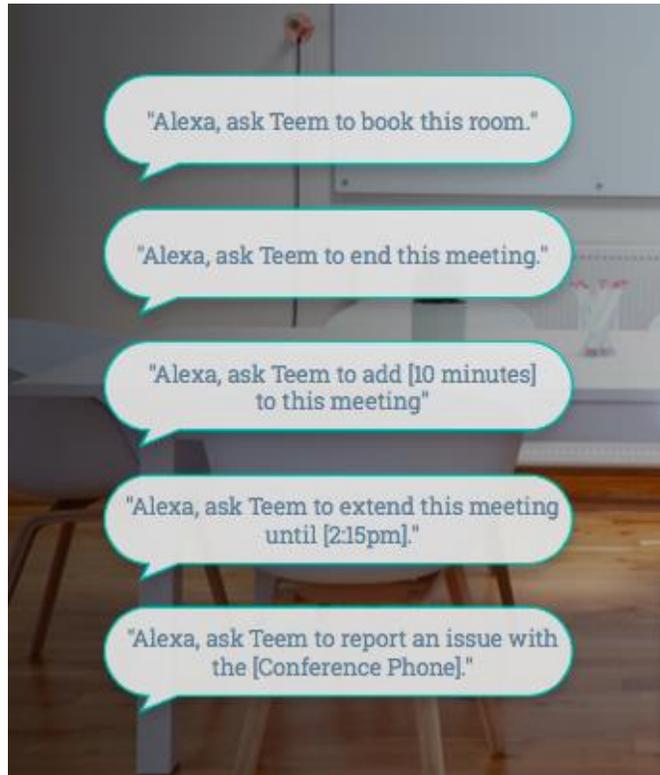

- Accurate real time occupancy
- Instant auto check-in and out (BLE)
- 3m accuracy indoor navigation using Meridian
- Find my friends Location Sharing through Meridian.
- BLE room authentication and trigger.
- Asset track enablement (Aruba Wifi and Meridian)
- Compare schedules with rooms.
- *Integration SDK with leading booking platforms.*

Quickly Find Available Rooms & Desks

# Intelligent Devices: Alexa + Print = Clearpass/ Introspect

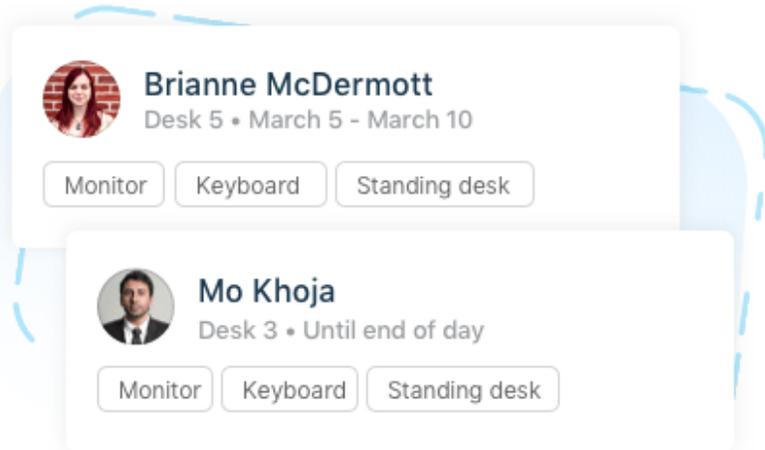

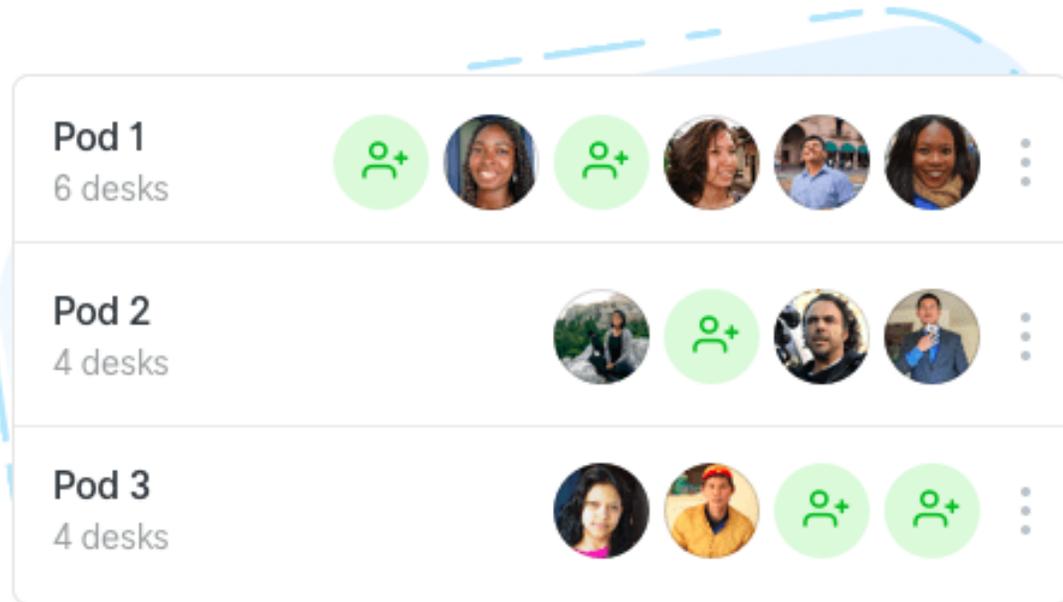

Voice Control for the of the Future:  
All it takes is a simple "Alexa, ask Teem to..." and you've added a natural convenience to many of the pain-points.

**Device as a service opportunity:** Manage printers and Voice enabled devices using Clearpass and Introspect. IoT authentication is key.

 alexa for business

# Intelligent Desk Booking:

Office seating plans powered by software, not spreadsheets:

Shuffling seats disrupts the office. This cuts down the changes you have to make, so you can arrange workspaces with confidence and avoid interruption.

## **SIMPLIFY YOUR SEATING**

- Get more out of your existing office space to avoid expanding too early
- Communicate simply if and when seat owners change
- Make colleagues easier to find, especially when you combine Desks with Meridian & Maps.

# Skype For Business / Microsoft Teams

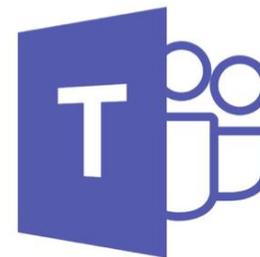

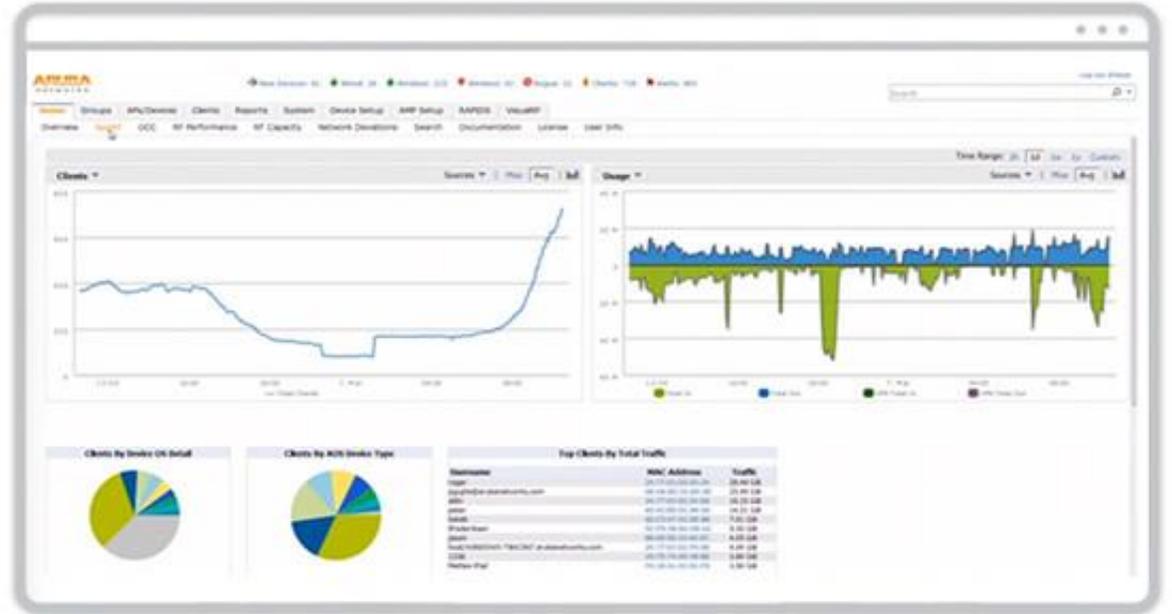

Today's workforce prefers the freedom and collaboration of mobile unified communications.

In both wired and wireless environments Aruba's solution prioritizes Skype for Business and Office 365 network traffic.

= fewer dropped calls, higher video quality, and **employees that can work from anywhere.**

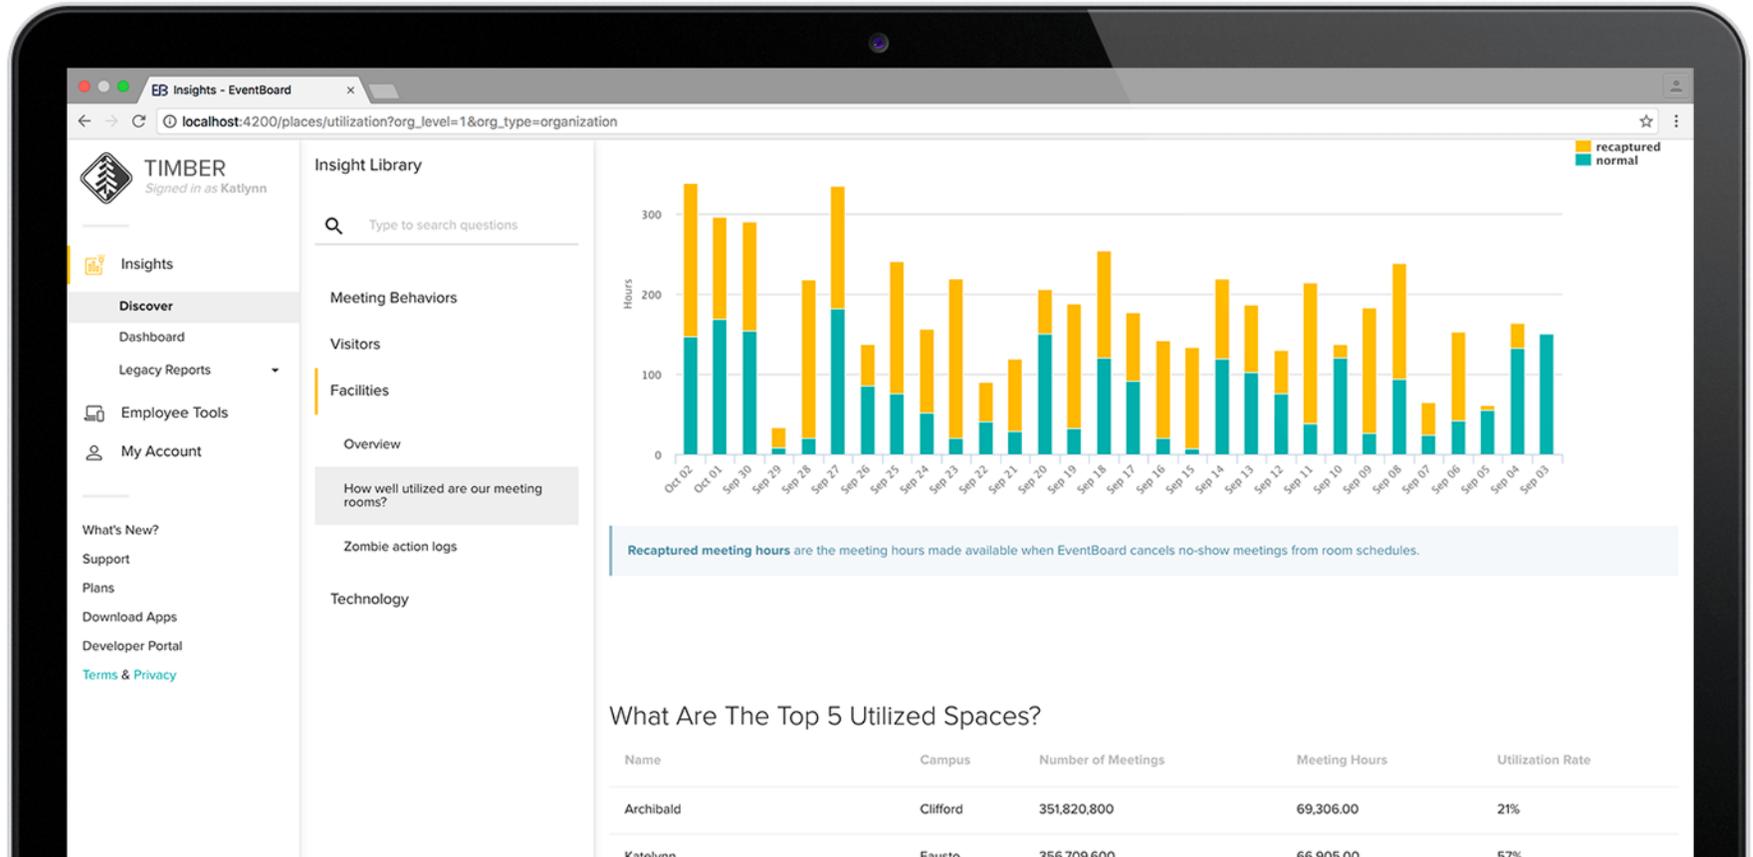

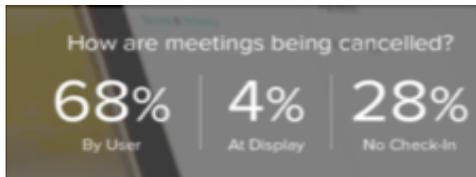

Visibility into Skype for Business traffic, real-time voice and video calls, and wireless network performance with AirWave.

Interactive dashboards make it easy to correlate call quality with client and network health, access call diagnostics, and view performance over time.

# Detailed Reporting and Analytics

- Monthly or weekly reports sent via email or push messaging to all employees or facilities
- Busiest location comparison and events weekly update
- Busiest users
- Worst offender

## New Play Cards: Engagement & Asset Tracking:

ARUBA PLAY CARD FOR MOBILE ENGAGEMENT				ARUBA PLAY CARD FOR ASSET TRACKING							
											
<b>ELEVATOR PITCH</b> Aruba's mobile engagement (ME) solution enables organizations of any type to digitally connect their employees, fans, or customers to their physical layouts using mobile-friendly apps that promote and improve user engagement and satisfaction.				<b>ELEVATOR PITCH</b> Aruba's asset tracking solution enables customers to increase staff efficiency and reduce equipment lease costs. Customers can leverage the value of their WLAN infrastructure to support the tracking of assets using Bluetooth Low Energy (BLE) technology. The benefits of Aruba's solution include low cost tags, visual location tools for mobile, integration with existing solutions and the ability to add wayfinding to ease in locating assets. All without incurring the additional cost and overhead of a dedicated asset tracking network.							
<b>ARUBA'S STATUS</b> Aruba's proven ME solution has been deployed at over 100 high-profile venues to date: VMware campus, Churchill Downs, Levi's Stadium, and Rio International Airport. According to Gartner, "Aruba is a global leader for Bluetooth Low Energy (BLE) indoor location services...and one of the first end-to-end solutions to offer multi-vendor, remote beacon management." <small>Source: Gartner, May 9 2016 report</small>				<b>ARUBA'S STATUS</b> Aruba's WLAN solutions are recognized by Gartner, and other analysts for technology leadership and innovation. The addition of asset tracking, extends that leadership by providing additional value that stems from our Meridian software offering, to our infrastructure and integration capabilities. In 2017, the solution won two industry awards: The CRN Tech Innovator Award for Wireless Networking and the IoT Evolution Asset Tracking Award.							
<b>TRENDS</b> <table border="1"><tr><td>85% of consumers view mobile devices as a central part of everyday life</td><td>60% of users have downloaded a mobile app to access information more easily</td><td>76% of users agree that location sharing provides more meaningful content</td><td>Office space optimization is driving the need to easily find and book open conference rooms</td></tr></table>				85% of consumers view mobile devices as a central part of everyday life	60% of users have downloaded a mobile app to access information more easily	76% of users agree that location sharing provides more meaningful content	Office space optimization is driving the need to easily find and book open conference rooms	<b>TRENDS</b> • Organizations are looking to enhance efficiencies – for example, in one study nurses spent the equivalent of 40 hours per month searching for missing equipment. • Automation allows for assets to be seen in real-time – this eliminates costly and unnecessary purchases – An East Kent Hospital study highlighted an excess of 98 infusion pumps, which saved the healthcare organization an annual lease cost of around £150,000. • Organizations are looking for ways to leverage wireless infrastructure and in some cases existing asset management solutions.			
85% of consumers view mobile devices as a central part of everyday life	60% of users have downloaded a mobile app to access information more easily	76% of users agree that location sharing provides more meaningful content	Office space optimization is driving the need to easily find and book open conference rooms

# Summary

# Outcome after all of this:

## *Your Secret Weapon for a Better Workplace*

More than a meeting room booking system, HPE Aruba gives you intelligent tools and powerful workplace analytics to optimize your most valuable resources: *Your people, places and technology.*

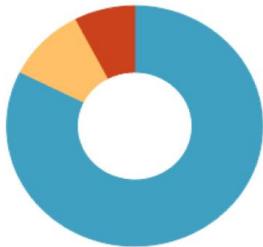

# Next Steps to Success with Aruba and TechData:

Together with TD, Aruba provides a 60 day POC includes 25 beacons and 5 meeting room licenses with Teem: Enabling a very simple step by step road to close:

- Install 25 beacons on Meridian giving the customer navigation, find my friend and context aware campaigns.
- Align the Meridian account to the Teem platform – Application Tokens
- Align Office 365/ Exchange or Google Suite to the Teem platform.
- Install the Teem application on the wall mounted tablets and the customer iOS and Android devices.
- Log in and start using the end to end solution, booking parking spaces, desks and conference rooms.
- Run the system for 14 days, book a follow meeting to run through insight analytics, zombie killer and customer feedback.
- Make changes and agree the business outcomes, agree to allow all employees to download the app and receive a PO!

# Example Analytics 4

## How often do meetings go unattended?

at:  for:

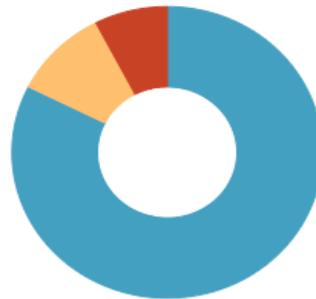

**18%**

Employees failed to show up for 18% of meetings.

### Attended vs Unattended Meetings

Count of attended meetings, Ghost Meetings (unattended), and Zombie Meetings (unattended)

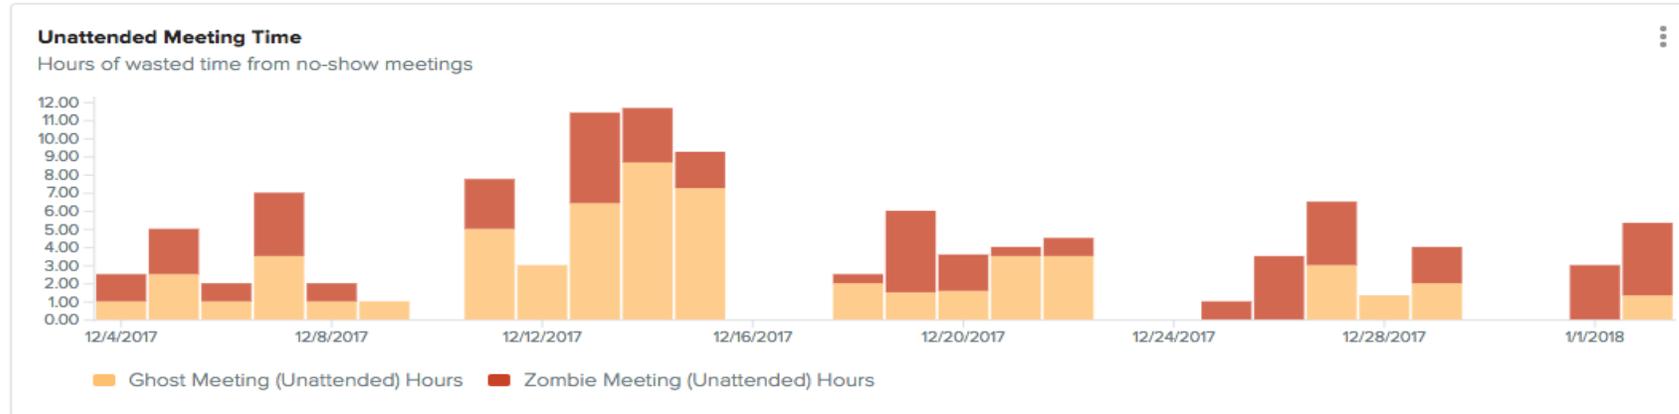

■ Attended Meetings: 652  
■ Ghost Meetings: 79  
■ Zombie Meetings: 60

There are two types of unattended meetings: Ghost Meetings (10%) and Zombie Meetings (8%). Between these, **18% of your meetings are no-shows**. Unattended meetings are detrimental to your workplace; learn how to reduce the negative effects of these no-shows below.

# Example Analytics 5

How much time is wasted by unattended meetings?

When a room is reserved for a meeting that employees don't plan to attend, it prevents others from reserving that room in advance. This causes others to delay important meetings and effectively slows down your company's productivity. It also affects your Perceived Utilization and reinforces employee belief that the workplace isn't adequate for their needs.

No-show meetings waste your real estate investment if the originally scheduled time can't be recaptured by your employees. If meeting participants plan to meet but the meeting owner fails to show up, it can cause up to 30 minutes of wasted time per meeting participant.

How many meetings are untracked by Check-in?

283 → 181  
Meetings Hours

Of your 1,238 scheduled meetings in Teem-powered rooms, 283 of them were not tracked by Check-in, which leaves **181 hours unaccounted for**. These Untracked Meetings prevent accurate reporting which in turn causes your ROI calculations and analysis to be misreported and for your real estate, facilities, and workplace decisions to be based off of incorrect information.

# Example Analytics 6

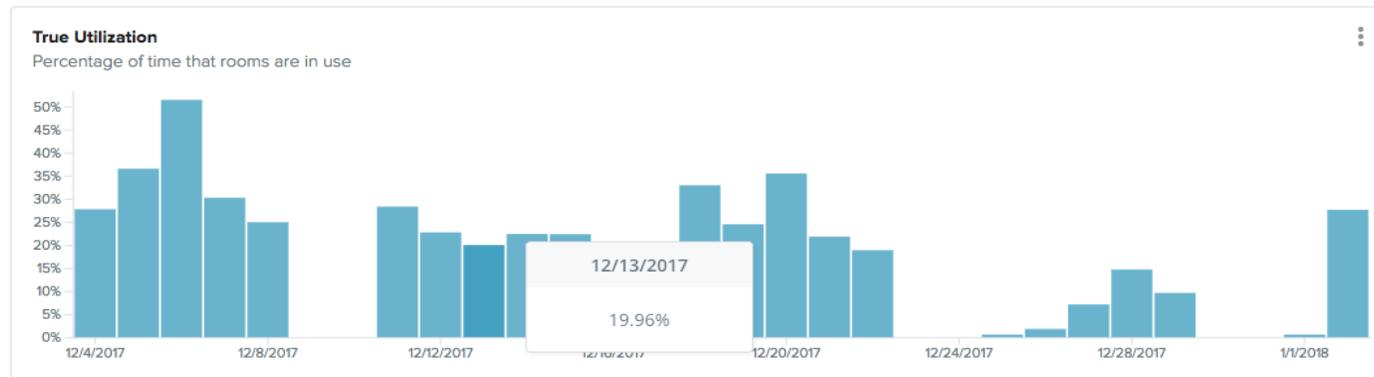

## What is your True Utilization?

at: HQ TEEM for: LAST 30 DAYS

### 22%

True Utilization for this location averages 22% over the last 30 days, or about 1.4 hours per room, per day.

True Utilization is a valuable metric that tracks how efficiently your organization is using its existing space. Teem has found that **ideal utilization is between 60% and 75%**. If you're below 60%, you're paying for rooms that your employees aren't using, but above 75%, employees don't notice available spaces - which can delay important meetings.

Make sure that you are optimizing room utilization by taking full advantage of Teem's efficiency-boosting features such as Check-in and Zombie Killer. These features will also help prevent employees from perceiving space utilization incorrectly.

It's important to note that Perceived Utilization is different from True Utilization, in that it is an inaccurate representation of room utilization. You may not be using your spaces as efficiently as it seems if you or your employees are making decisions based on Perceived Utilization. Read below to learn more about Perceived vs True Utilization.
