# Trusted advisor in action – ideal networks

*"We have a very positive relationship with Tech Data and there is a good mix of strategic and transactional level engagement. There is a strong desire to add value and we do benefit from our participation in some of Tech Data's innovative programmes such as Mentori."*

**Mike Henson, Managing Director**

*"Tech Data and their highly skilled staff have been an integral part of delivering high quality leading edge solutions to some of the UK's leading companies where innovation is expected in all that we deliver. The product leaders, technical architects and specialist support staff are the difference that Tech Data offer to us as a leading IBM Premier Business Partner with fast, accurate and complementary advice and pricing that gives us the required competitive advantage."*

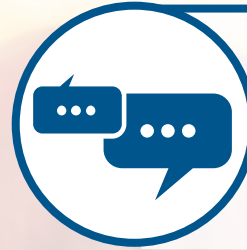

**Ian Campbell, Account Director**

*"We could not have been more delighted with the support we received from Tech Data. When you are selling to a fast-growing fintech, you need to be seen as authoritative and credible right away. Tech Data gave us that extra kudos and confidence we needed. The fact that Tech Data were prepared to go in with our team and add their expertise in storage and DC technologies to our own, made all the difference and resulted in a very big net new win for Tectrade."*

**Paul Cameron – Sales Director**
